

Color Worlds Discover!

Immerse yourself in our color world and discover
countless design possibilities from classic-elegant to
completely individual design.

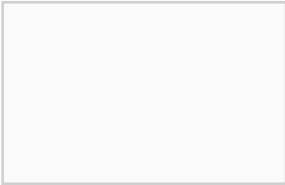

Color can do many things.

Color integrates, creates orientation and guides the eye · it can emphasize or deliberately recede into the background. At the same time, it influences how we perceive spaces: surfaces appear larger or smaller, more open or more compact. Thus, color creates a clear identity that unifies the space and gives it character. With our color concept, you have countless possibilities to determine the impact of your rooms.

Proven Bestseller Colors

- + Shortest delivery times for quick project completion
- + No additional costs · the bestseller colors are always included in the price for you

Note: All HPL surfaces feature a fine hammered finish. It provides a modern look, visibly reduces signs of wear such as scratches and fingerprints, and minimizes light reflections for a matte appearance. Robust and easy to clean, it is particularly suitable for heavily frequented areas. This applies to the HPL surfaces shown here as well as all subsequent ones.
