TYPO R Corrosion Protection Guarantee

Corrosion Protection Guarantee

KEMMLIT Typo R Locker System

Typo R is the only cavity-sealed, seawater-resistant aluminum body with a 30-year corrosion protection guarantee. Closed profiles, fully painted cavities with consistent uniform, double-sided coating with a total thickness of 56µm offer optimal protection and durability - Made by KEMMLIT

1. Duration of Guarantee

For a period of 30 years from the invoice date, the buyer receives, in the event of corrosion-related pitting, a guarantee on KEMMLIT Typo R locker systems.

2. Prerequisites

The guarantee claim is only valid for the construction project in which the locker system was initially installed by KEMMLIT technicians trained by the factory. The guarantee claim exists only for damages to the subject of the contract. The fully completed guarantee card with the proof of purchase including date serves as proof for the guarantee claim.

3. Service

For the duration of the guarantee, we will rectify all defects in the KEMMLIT locker system that are demonstrably attributable to a material or manufacturing defect and thus have led to corrosion-related pitting. We undertake, at our discretion, to replace the defective goods free of charge with defect-free goods or to repair them. Replaced parts become our property. The guarantee period is not extended by the replacement of individual elements. Should a 1:1 replacement not be possible due to a product or color change within the scope of the manufacturer's guarantee, we will credit the corresponding value of the guarantee claim towards the re-order of the successor design or color.

Claims for damages or reimbursement of expenses are excluded.

Excluded are damages caused by:

- negligent and willful destruction
- improper commissioning and operation
- external influences such as fire, salts, alkalis, acids, abnormal environmental influences
- mechanical damage due to improper modification / self-assembly
- primers and other surface alterations
- incorrect or untimely maintenance
- repair by unqualified persons
- use of parts of foreign origin without the manufacturer's consent
- removal of components
- neglected care
