TYPO S Corrosion Protection Warranty

Corrosion Protection Guarantee

KEMMLIT Typo S Locker System

Typo S is the only cavity-sealed and cavity-galvanized metal body with a 20-year corrosion protection guarantee. Closed profiles, 100% galvanization with a 275g strong zinc coating per m² and fully painted cavities with consistent, double-sided coating with a total thickness of 70µm offer the best possible protection and durability - Made by KEMMLIT

1. Duration of Guarantee

For a period of 20 years from the invoice date, the buyer receives a guarantee against rust-through in KEMMLIT Typo S locker systems.

2. Prerequisites

The guarantee claim is only valid for the construction project in which the locker system was initially installed by factory-trained KEMMLIT installers. The guarantee claim exists only for damage to the contractual object. The fully completed guarantee card with the proof of purchase including the date serves as proof for the guarantee claim.

3. Scope of Service

For the duration of the guarantee, we will rectify all defects in the KEMMLIT locker system that are demonstrably attributable to a material or manufacturing defect and have thus led to rust-through. We undertake, at our discretion, to replace the defective goods free of charge with defect-free goods or to repair them. Replaced parts become our property. The guarantee period is not extended by the replacement of individual elements. Should a 1:1 replacement not be possible within the scope of the manufacturer's guarantee due to a product or color change, we will credit the corresponding value of the guarantee claim when reordering the successor design or color. Claims for damages or reimbursement of expenses are excluded.

Excluded are damages caused by:

- negligent and willful destruction
- improper commissioning and operation
- external influences such as fire, salts, alkalis, acids, abnormal environmental influences
- mechanical damage due to improper modification / self-assembly
- primers and other surface alterations
- incorrect or untimely maintenance
- repair by unqualified persons
- use of parts of foreign origin without the manufacturer's consent
- removal of components
- neglected maintenance
