

NiUU one

EXCLUSIVE DESIGN | PARTICULARLY FAST DELIVERY | AFFORDABLE

NiUU[®] one

The new NiUU one WC partition **system** is the **flush-surface** partition for which there are two different system constructions:

NiUU one made of wood-based material or alternatively

NiUU one made of very robust composite panels

Both variants are characterized by the flush-surface design. This creates a **high-quality look** and a timeless design. The construction details are designed **for stability** and years of trouble-free function. The 3-roller edge hinges, specially developed for WC areas, are screwed six times. The partition feet made of aluminum with a stainless steel core are continuously height-adjustable. As an alternative to the classic set with WC lock, KEMMLIT handle bars are available.

NiUU one can be implemented with particular flexibility: From the standard version with feet and stabilizer in the front to a floor-to-ceiling **enclosed** solution.

With this variant, doors can be manufactured up to 2800 mm in one piece.

NiUU one comes with a 7-year

KEMMLIT guarantee.
