For more than 50 years, we have been realizing annually over 9,000 projects in the commercial, public and private sectors.

**INDUSTRY AND COMMERCE**  
Industry, Production,  
Business Parks, Plants

**OFFICE AND ADMINISTRATION**  
Companies, Administration, Office,  
Office, Authority

**SWIMMING POOL AND LEISURE**  
Sports, Pool, Leisure,  
Camping, Hotel

**SCHOOL AND UNIVERSITY**  
School, University,  
College, Education

**HOSPITAL AND CARE**  
Hospital, Nursing Home,  
Care, Rehab

**FIRE DEPARTMENT AND RESCUE**  
Fire Department, Emergency Services,  
DRK, THW

# Product Range For Every Requirement

Clever solutions for numerous industries and sophisticated product details are the result of continuous improvement work.

**Thomas Bopp,**  
Head of Sales

## Lockers

With our wide range of products and extensive designs and features, we find the right solution for every requirement. From classic lockers to individual solutions.

## Lockable and Valuables Compartments

The lockable and valuables compartments are space-saving and particularly robust. They offer users a secure place for the small but valuable things in life.

## Charging Station powerBox

The lockers with power supply are the perfect solution for charging batteries and securely storing them at the same time. Each compartment offers secured power connections.

## Benches

The KEMMLIT bench program impresses with its functionality and design - from the classic bench to the stylish seating cube.

## Partitions and Cubicles

Our WC partitions, shower and changing cubicles are coordinated with the complete product range in terms of color and design. We always develop customer-specific solutions.

## Accessories

Hairdryer stations, shelves, storage units, and hook strips complete the product range and can be considered during planning with the specialist consultant.

IXOS P with HPL door Version as Z-locker and with pre-installed bench

IXOS P stainless steel hinge and door opening restrictor

IXOS P with HPL door in 13 mm thickness

TYPO R wardrobe locker in special color and with number plates

TYPO R stainless steel hinge and stable central post

TYPO R clothes rail with double hooks

# IXOS® P HPL construction

The IXOS P locker consists of solid HPL core panels, which are quickly and easily assembled on-site using special aluminum profiles in an innovative plug-in construction method. Solid equipment details, water resistance, ease of cleaning, and high break resistance characterize

IXOS P. Depending on the intended use, a one- or two-part construction or the Z-locker version is possible. The latter saves space and still offers room for long garments. Thanks to the individual interior fittings, IXOS P is versatile in use.

Particularity Stable Hygienic Versatile Water-resistant

# TYPO R aluminum body

The TYPO R locker body consists of environmentally friendly and seawater-resistant aluminum. The form-fitting metal body achieves maximum stability and corrosion protection through the special press-joining process. As door solutions, HPL or glass are available for selection.

The aluminum doors are coated with the scratch-resistant Crystal Coat lacquer surface. TYPO R also offers industry-specific equipment solutions. From individual locking variants to innovative ventilation concepts.

Stable Versatile Water-resistant

TYPO S wardrobe locker with glass doors in special colors and integrated bench

TYPO S with HPL door and fixed partition wall

LUPO lockers in RAL 7035 light grey, doors in RAL 5010 gentian blue with integrated bench

LUPO with clothes rail and hooks

LUPO integrated bench with shoe rack

# TYPO S steel body

TYPO S is the proven solution with a cavity-sealed and galvanized steel body. The metal body achieves through the special press-joining process maximum stability and corrosion protection. Therefore, we grant on this product type a corrosion protection guarantee.

of 20 years. For TYPO S, there are three locker door solutions: steel, HPL or glass. Customized interior fittings such as helmet hooks, fixed partition wall and locker ventilation are also possible with TYPO S.

Stable. Versatile. Affordable

# LUPO Classic Steel Locker

The LUPO locker series consists of sheet steel and impresses with its solid construction and a very good price-performance ratio. There are four different standard variants available: wardrobe lockers, black/white lockers, compartment and

valuables lockers. The body is made in RAL 7035 light grey. The locker door is available in three different colors. The lockers are either on a plinth or on a base frame with integrated bench installed.

Stable. Particularly affordable.

PURO W Cabinet as a Single and Double-Part Unit

PURO Hinge with Soft-Close Function

PURO Clothes Rail with Hooks

powerBox with PIN Lock

powerBox Service Compartment for Maintenance

powerBox Safety Power Strip

# PURO W/D Elegant Cabinetry

Thanks to its solid, profile-free construction, PURO is the elegant locker series. Depending on the application, two variants are available: PURO W made of 13 mm HPL for wet rooms or PURO D made of 19 mm sustainable wood-based material. The standard soft-close function allows for

quiet closing of the cabinet door. PURO is available as a single or two-part cabinet. The shelves are height-adjustable. The lockers are excellently suited for storing personal items and for use in offices and administration.

ElegantHygienicQuiet

# powerBox Lockers with Power

The powerBox lockers are the perfect solution for charging batteries and storing them securely at the same time. Each compartment is equipped with two sockets and two USB ports, so that e-bike batteries, smartphones, tablets, and laptops can be charged.

The safety package consists of overload protection and an RCD (residual current device). The standard break-in resistance protects against theft and vandalism. The cabinet body is made of aluminum. The doors are made of robust HPL.

Special Robust Electrified Clever

Our commitment goes far beyond planning and production. We handle all logistical tasks up to professional installation by KEMMLIT fitters.

Key Account Manager

# Doors and Locks: Individual and Flexible

Wardrobe lockers TYPO S with enameled glass doors

## Materials

Our product portfolio is characterized by numerous materials that are perfectly coordinated. For every requirement and every budget, we find the suitable material.

### HPL (High Pressure Laminate)

HPL is a high-pressure laminate panel made of paper layers, which are pressed under high pressure into extremely robust panels. HPL is high-quality, hygienic, suitable for wet rooms, and heat-resistant.

### Glass

Single-pane safety glass is used for the locker doors. Glass is characterized by a high-quality appearance, stability, and ease of cleaning.

### Door Features

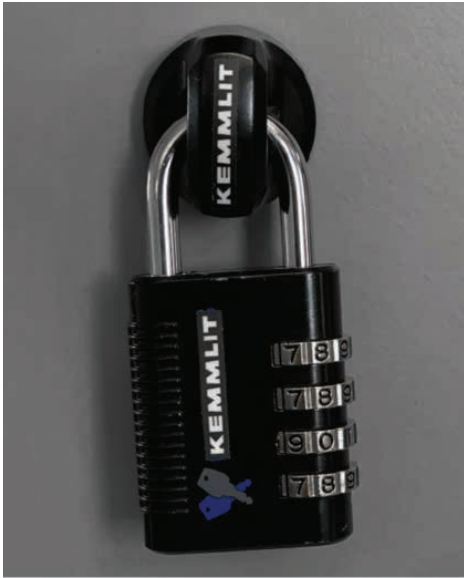

- Numbering via engraving/plate
- Letter slot
- Ventilation slots
- Viewing window made of Plexiglas (HPL only)
- Others on request

### Steel

Steel locker doors are scratch- and abrasion-resistant. Due to the galvanization with aluminum content, the steel lockers have increased corrosion resistance.

### Engineered Wood

Lockers made of engineered wood are manufactured from sustainable raw materials.

Turn lock for padlock

Cylinder lever lock

## Locks and Features

Whether for changing or personal use, KEMMLIT offers the optimal and individual solution.

### Mechanical Locks

#### KEMMLIT select

- KEMMLIT select combination padlock
- KEMMLIT select security turn lock for padlock

Hat shelf made of sheet metal or HPL

- Special accessories for fire brigades and rescue services**
- Helmet holder
  - Sturdy hook for firefighter's belt
  - Internal valuables compartment with drop slot

Towel hook

Fixed partition wall

Storage compartments for shower essentials

Sliding double hooks

Extendable clothes rail

# Ideal Ventilation Concept

Forced ventilation through connection to a site-provided exhaust air system

A smart ventilation concept offers many benefits: among other things, it prevents unpleasant odours and enables quick drying of clothing.

**Self-ventilation**  
All models are designed to ensure permanent air exchange. This is achieved via a recessed lid and base or via ventilation perforations in the rear wall or door. With an additional perforated base, the air exchange can be increased even further.

**Electronic Fan**  
To increase air exchange and especially to accelerate the drying of clothing, the locker can be equipped with an electronic fan that permanently blows the moist air out of the locker.

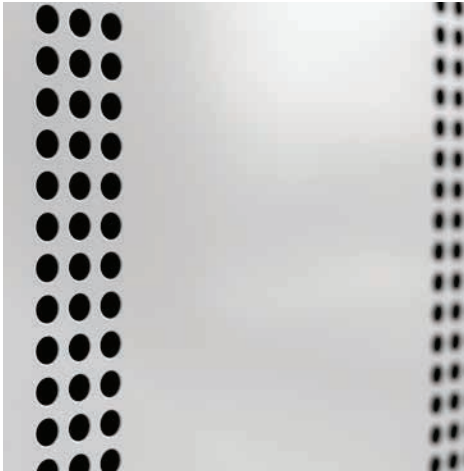

**Forced Ventilation**  
For ideal air exchange and a perfect indoor climate, connection to a site-provided exhaust air system is recommended. The connection is made via an adjustable disc valve in the roof. Alternatively, the air duct can be routed in the sloped roof. Our recommendation: With a ceiling-high HPL panel, the ventilation pipes can be elegantly concealed.

Electronic fan for active air exchange disc valve

Ventilation perforation in the rear wall

Perforated metal door for ventilation

Self-ventilation in the base

# Surface Design True Eye-Catchers

Wardrobe Lockers IXOS P with individual Digital Print

By using individual digital and foil prints, various wood decors or special colours, your lockers and storage compartments are transformed into a real eye-catcher!

**Digital Print**

These can be excellently realised on HPL doors. This creates unique changing rooms in a special design. Regarding the motifs, there are no limits to imagination. Whether abstract symbols, lettering, company logos or fantastic photo prints. With an individual digital print, well-thought-out room concepts are perfectly rounded off and give the rooms that certain something.

**Foil Print**

Foil prints can be realised on any surface - large-scale or as a cut-out motif. We are happy to consider your individual design already during planning.

**Wood Decor and Special Colours**

On request, we also offer various wood decors and plain-coloured special colours.
